TRUE NORTH - MORE OUTDOOR

True North hardware offer you a wide range of products in highest quality. Tents, sleepingbags, backpacks and accessories for all weather conditions. Every material, fabric and design element is chosen to simplify your outdoor life.

True North offers you both Nordic traditional tunnel and self standing dome tents. The tunnel tents are very easy to set up and offer you a generous space. This type of tents requires guylines and pegs to stand stably. The tunnel tents are the most common tents in Scandinavia because of unstable weather and a lot of rain. The extra space gives you opportunity to cook inside. Self standing dome tents are stable also without pegs and guylines, this type of tents are preferred under tough pitching conditions. All outer tents are produced in Duralite WP+ polyester ripstop. The roof of the inner tents are made from high quality breathable polyester and the floor from highly waterproof PU polyester. All accessories are carefully chosen to offer you a great product.

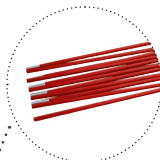

All ventilations and door openings are covered with mosquito nets.

Ventilation on each vestibule for better all weather comfort.

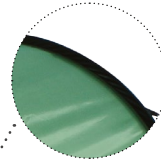

Lightweight poles in the best aluminum 7075 quality. Anodized in red colour

Guy lines and attachments in best quality for stability in rough conditions.

"Easy set up" channel closed on one side. Stronger fabric on critical areas.

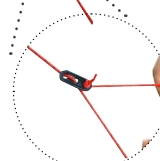

Adjustable peg attachment. Metal ring and webbing straps in high quality.

Temperature rating

Please be advised that the sleeping comfort is depending on your physical condition, body weight, clothing and gender. In the extreme range a strong sensation of cold should be expected. Always adapt your clothing to the current temperature for best possible comfort.

The Upper Limit of Comfort is the highest temperature that you can sleep without sweating profusely. Usually this is defined with the ventilation zippers open, arms outside the bag and the hood open.

The Lower Limit of comfort is usually defined as the lowest temperature at which a person has eight hours of sleep without waking.

Extreme Temperature is the lowest temperature at which the sleeping bag protects the user from hypothermia. This is subject to a variety of conditions but is usually defined as six hours of uncomfortable sleep without diminishing the body core temperature to a dangerous level.
